## EXPERIENCED CONSTRUCTION AND PROJECT MANAGER SEEKING NEW CHALLENGES AT MI SUPPORT

---

Your position as a construction and project manager perfectly aligns with my passions and skills. With my extensive experience as a construction and project manager, I am confident that I can bring a unique perspective and add value to the team. I am passionate about working with complex construction projects, and this role would provide me with the opportunity to challenge myself and continue learning and growing. Therefore, I am convinced that MI Support is the ideal place for me to apply my passion and skills.

---

## PROJECT MANAGEMENT WITH EXPERTISE

---

My technical background as a building constructor has equipped me with a wide range of competencies in management, which are beneficial in complex construction projects. I also have experience with financial management and planning, which ensures that projects stay within budget. This was especially evident in my previous position as operations manager at the housing association Lejerbo, where I was responsible for daily operations and staff management, while also overseeing projects and ensuring they were completed within the set timeline.

---

## STRUCTURED COMMUNICATOR

---

As a person who thinks innovatively and sees opportunities rather than limitations, I will also bring new ideas and perspectives to MI Support's projects. I am very structured and systematic in my approach to work, and I possess strong communication skills. With me as a colleague, you'll have someone who works independently but is also capable of collaborating across the organization, both internally and externally. I look forward to hearing more about MI Support's exciting projects and how I can contribute to the company's continued success.

I look forward to hearing from you and hope for an interview where I can elaborate on the above.

**Sincerely,  
Rasmus Glad**
